DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 18-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 18 is drawn to a method of making methyl methacrylate using the tert-butanol prepared by the process of claim 1; however, the claim does not recite what reaction steps are involved subsequent to supplying the tert-butanol. Furthermore, the process by which tert-butanol was made may not necessarily confer patentability to the method of making methyl methacrylate.

Claim 19 is indefinite because the claim does not specify what type of peroxide is being made or what reaction steps are involved subsequent to supplying the tert-butanol. Furthermore, the process by which tert-butanol was made may not necessarily confer patentability to the method of making a peroxide compound.

Claim 20 is indefinite because it is unclear in what way preparing tert-butanol according to the process of instant claim 1 relates to an improvement in the *isolation* of isobutene from isobutene mixtures.

Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter: claims 1-17 are drawn to a process for preparing tert-butanol. The closest prior art fails to teach or fairly suggest the preparation of tert-butanol under the very specific conditions, specifically, proportion of water in the reaction mixture, as claimed herein.

Specification

The specification is missing a "Brief Description of the Drawings" heading. Proper correction is required.
